ABOUT ME

10+ years of professional experience in Software Development. The goal of this CV for me is to find a project or job in which I can apply all my knowledges of programming languages such as WinForms , C#.Net, Swift (iOS) and .Net Core Web Restfull API.

My interests include such applied areas as financial accounting, billing, stock analytics and trading automation (to make robots).

I have two degrees. Topic of my first diploma was Artificial Neural Network. The diploma from my second higher education was related to Game Theory.

LATEST PROJECTS

CryptoAlert and **Kontur.Fruit** can be found on Apple AppStore. These apps have a mobile frontend for iOS, implemented in Swift, UIKit, MVVM and backend with using 1C COMConnector, MS SQL Server and C#.Net Core v.6 Restfull API. ([here is link to GitHub](#)).

The **CryptoAlert** app also uses libraries Binance.Net, Kucoin.Net, Huobi.Net and Google Firebase PUSH Notification Service.
